

Magic Sculpt®

Painted Grasshopper (Dacty Lotom BiColor), Actual Size (7-3/4" x 1-3/4"). Original Sculpture in Magic Sculpt by Greg Brenden, Tucson, Arizona.

For Crafts and Hobbies, Magic Sculpt is both a medium and an ingredient for any project requiring sculpting.

West Coast Supply Company
Rancho Cordova, California

Your imagination is the only limit when it comes to devising uses for Magic Sculpt. We have letters from all around the country telling us the ways Magic Sculpt is being used – including ways we never expected to hear about! Some people use it so frequently they purchase it in 20 pound kits, other buy a one pound kit and have a lifetime supply for their needs.

When you purchase a kit you will have a miracle in a jar for just about any hobby or repair job you might have. And the best part is that it replaces so many other compounds that can cost hundreds of dollars when you buy a "little of this and a little of that".

Need a block of workable material for a sculpture?
Need a filler for another medium?
Need to attach two objects with an exact buffer?
Need to repair a hole in just about anything?
Need to create a smooth or textured surface?
Need to increase the thickness of another material?
Need to create a customer bushing, spacer or part?
Need to rethread a bolt or fill a screw hole?

PHOTOS BY KENT WOOD

Sow Bug (Oniscus Asellus), Actual Size (4-1/4" x 2"). Original sculpture in Magic Sculpt by Greg Brenden, Tucson, Arizona.

Professionals and hobbyists are thrilled by the features of this amazing product. It is very pliable in its mixed form, has excellent adhesion, cleans up easily with soap and water, and will cure to a hard, solid finish that can be painted, sanded or grounded.

Magic Sculpt serves so many purposes it eliminates many of the different formulas cluttering your workspace. And, with its indefinite shelf life, you do not need to worry about whether you have enough of this or that, just keep a stock of Magic Sculpt sitting on your countertop.
