

Free Standing Heaters

Free Standing Heaters Straight Line Bender for Bending Plastics

These products are not stocked at TAP retail stores - they can be ordered. Please see them at tapplastics.com

These heaters are the same ones that TAP uses in our fabrication shops, and have been designed to give consistent, professional-quality bends while working with many types of thermoplastic materials. They are essentially used for straight line bends or folds and are capable of heating up to 1/2" thick material. All units (120v and 240v) come with the appropriate power cord and are ready for operation. Maximum rated operating temperature is 800°f. An optional Power Control (120v units only) is available where temperature control is desired.

SPECIFICATIONS: 120v Heaters

Model No.	FS-24	FS-48
Heated Width/Length	1/2" x 24"	1/2" x 48"
Total Length of Tray	35"	59"
Watts/Amps	220/1.8	430/3.6
"A" Dimension	1/2"	1/2"
