HOLLOW "GLASS" SPHERES

- Synthetic • Inorganic
- Light Weight • Easy to Sand

CAUTION: Eye and skin irritant.
Avoid inhalation. See Caution on back.

NET WT. 4 oz.

TAP Plastics Inc • San Leandro CA 94577

INSTRUCTIONS: Light weight, white filler adds "particles of air" to solid materials. Use with polyester or epoxy resins. Can displace 4 to 6 times the weight of resin. Improves fabrication, sanding, and handling characteristics of resin. Reduces shrinkage.

Experiment with ratio of filler to resin to find formula best suited for application. Cure time can be affected by use of fillers.
