

Use with TAP SILICONE RTV
Mold Making Compound Side A
(See Side A for instructions)

Keep tightly closed after use.
Catalyst exposed to air for
extended periods of time will
cure. An indication of cure is a
film or crust formation on the
surface of the catalyst. Should
this occur, simply remove the
hard film, and use the
remaining portion. The use of
cured catalyst is not
recommended and may cause
incomplete cure of silicone.

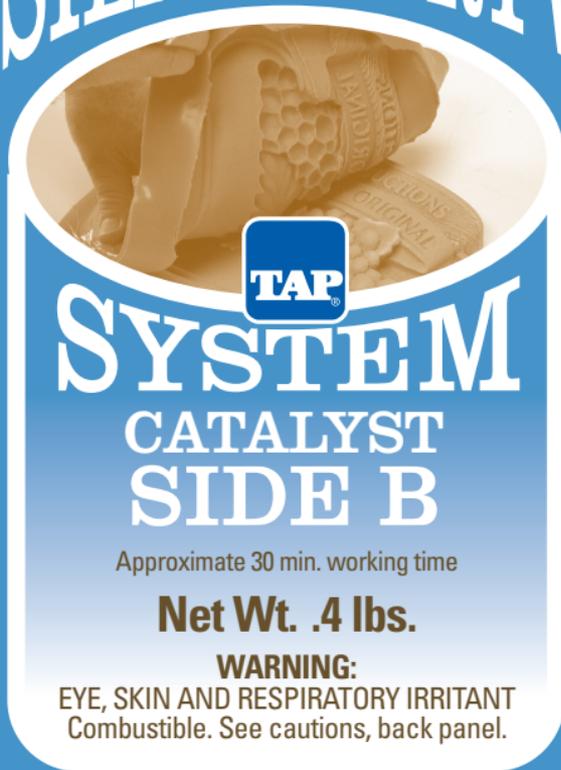

DIRECTIONS:

Refer to detailed instructions
on TAP SILICONE RTV Side A
for directions. See also
Product Bulletins 7A & 7B.

Rev. 6/23/11

Date Code: 23022

SILICONE RTV

Refer to Side A
for mixing instructions

CAUTIONS:

In case of eye contact, flush
at least 15 minutes with
water. Obtain medical
attention if irritation
persists. Wash after skin
contact. Obtain medical
attention if irritation
develops. Follow all
instructions for safe use.
**KEEP AWAY FROM
CHILDREN.**
