# ACRYLITE® Satinice

## Technical Information

**Product**

Elegant and captivating, the suite of ACRYLITE® Satinice acrylic sheet and tube products stimulate the imagination. The subtle surfaces and impressive array of colors open the door for inspiration with sumptuous textures that will enhance any environment with beauty as well as durability.

Resistant to traces of wear and finger marks, these products are technologically developed to also have the perfect balance between transmission and diffusion. ACRYLITE® Satinice is designed to enhance virtually any environment with light and brilliance.

## Applications

ACRYLITE® Satinice offers excellent solutions for the following applications:

- decorative glazing, privacy partitions, shelves, furniture, POP, retail/store fixture displays and exhibition booths
- wall paneling in architectural applications
- white/translucent grades as covers for lamps and skylights (especially 0D010 DF)
- tubes as luminaires or lighting elements

## Fabrication

ACRYLITE® Satinice can be fabricated just like ACRYLITE® acrylic sheet and tube. The following fabrication briefs are available for ACRYLITE®:

- Machining (tech brief 11)
- Thermoforming (tech brief 10)
- Cementing (tech brief 8)
- Handling & Maintenance (tech brief 1)

## Properties

ACRYLITE® Satinice offers the following unique features:

- white grades with varying degrees of light diffusion
- balanced ratio of light diffusion and transmittance
- resistant to traces of wear
- excellent light transmission and brilliance
- 100% recyclability
- very high weather resistance
- easy fabrication
- light weight – about half the weight of glass
- 11 times the impact strength of glass
- some grades meet food contact requirements
Surfaces and other properties of the various products:

**sheet – velvet texture, cast (formerly P95/DP9)**
- velvety frosted surface on one or both sides
- light diffusing
- extremely easy to machine and fabricate
- wide range of thicknesses and colors available
- fingerprint and scratch resistant surface

**sheet – satin texture, optimal light diffusion, extruded (formerly Satin Ice)**
- soft frosted surface
- light diffusing beads evenly distributed throughout material
- texture is retained after thermoforming
- excellent balance between light diffusion and light transmission (up to 89%)
- fingerprint and scratch resistant surface

**sheet – crystal surface, extruded (formerly Crystal Ice)**
- more durable textured surface
- excellent thickness tolerance
- texture is retained after thermoforming
- texture on surface – clear throughout
- fingerprint and scratch resistant surface

**tube – satin texture, optimal light diffusion, extruded**
- soft frosted surface
- light diffusing beads evenly distributed throughout material
- UV resistant and perfect for any lighting design
- suitable for food content
**Physical forms**

**ACRYLITE® Satinice** is available in the following standard sizes/thicknesses and colors. Other sizes/thicknesses and colors may be available. Minimums may apply.

### ACRYLITE® Satinice sizes

<table>
<thead>
